Olivier Page

Full-stack Developer | **C#** | **Java** | **Angular** | **Azure** | Certified Claude

opage4@gmail.com 06 84 05 28 90 olivierpage.com opage opage

Introduction

Software craftsman applying ***SOLID principles*** and having a team spirit.

Senior developer with 10+ years of experience in **C#**.

Confirmed experience in **Java** and **Angular**.

Intermediate experience in **Azure**, **Python**, and **C++**.

Experience

Advanzia Bank, Senior Backend Developer (**C#**) - SFEIR Luxembourg
Munsbach, LU
Digital fintech bank specializing in credit cards, payment solutions, and cards-as-a-service for customers and partners across Europe
Sept 2025 – June 2026
10 months

- Integrated the Amiko **SaaS** solution for fraud and dispute management in C# using a CQRS architecture.
- Added **TSYS** endpoint integrations for payment processing, orchestrated with the Saga Pattern on MassTransit (**Azure** Service Bus).
- Developed REST web services in C# to manage transactions and disputes on SQL Server.
- Implemented end-to-end encryption (E2E Encryption) with key management in **Azure** Key Vault.
- Resolved defects by testing and debugging the C# codebase in Visual Studio.
- Performed code reviews in **Azure** DevOps to uphold code quality and best practices.

Methodology & tools: Visual Studio (IDE), **Azure** DevOps, **Git**, **DDD**, Event-driven, CQRS Pattern, Saga Pattern
Environment: C#, Aspire, **Azure** Cloud, MassTransit (**Azure** ServiceBus), **Azure** Key Vault, SQL Server
Team size: 2 Developers, 1 QA, 1 Tech Lead

Evolution Energie, Full-stack Developer (**C#**) - SFEIR Paris
Paris, FR
Renewable energy company focusing on sustainable solutions and energy efficiency
Feb 2025 – Aug 2025
8 months

- Migrated authentication from WS-Federation to OpenID Connect / OAuth 2.0 with Entra ID.
- Implemented an **API Gateway** and a YARP reverse proxy to route incoming requests, secured with JWT and API Key.
- Upgraded existing C# applications to .NET 8.0.
- Reviewed code in **Azure** DevOps to enforce quality standards and best practices.

Methodology & tools: Visual Studio, **Azure** DevOps, **Git**
Environment: C#, .NET 8.0, OpenID Connect / OAuth 2.0, **API Gateway**, JWT, API Key, YARP Reverse Proxy, JavaScript, Vue.js, SQL Server
Team size: 2 Developers, 1 Tech Lead

Amundi Asset Management, Full-stack Developer (**Java**) - SFEIR Paris
Paris, FR
Global asset management company providing investment solutions and services to institutional and retail clients
Aug 2021 – Jan 2025
3 years 7 months

- Maintained the main ALTO Front Module fund management tool (PFA) in **Java** 11.
- Maintained plugins such as Cash Management and Money Market in **Java** / Spring.
- Implemented the AOP plugin (ALTO OTC Trade Management) in **Java** / Spring to integrate Lyxor funds.
- Developed Maestro widgets in **Angular** / TypeScript with NgRx for ALTO Investment Research (IR).
- Developed REST web services in **Java** 21 with Spring Boot and Spring Batch for ALTO Investment Research (IR).
- Wrote unit tests with JUnit and Mockito to validate delivered functionality.

Methodology & tools: Eclipse, IntelliJ IDEA, GitLab, Jenkins, JIRA, ArgoCD (GitOps)
Environment: **Java** (11 and 21), Spring (Boot / Batch), **Angular**, NgRx, TypeScript, Python, Sybase SQL, JIDE Docking Framework, JUnit, Mockito, Docker, Kubernetes
Team size: 3 Developers, 1 Tech Lead

Lyxor Asset Management, Full-stack Developer (**C#**) - SFEIR Paris — Paris, FR
Global asset management company specializing in ETFs, index funds and was acquired by Amundi — Sept 2018 – Sept 2021
3 years 1 month

- Developed management tools for synthetic and physical funds in C# / .NET Core and **Angular** to meet stakeholder requirements.
- Built the SBF tool from scratch in .NET Core and **Angular** / NgRx to manage synthetic funds.
- Refactored and maintained Lyxor ETF tools (Lyxor AP, Sherlock, GI) in C# / .NET Core.
- Improved application performance by caching data in **Redis**.
- Wrote unit tests with NUnit.

Methodology & tools: Visual Studio, TeamCity, JIRA, GitHub
Environment: C#, .NET Framework, .NET Core, API Rest, SOAP, **Angular**, NgRx, **Redis**, EF Core, Dapper, SQL Server, NUnit, **Java**, Spring
Team size: 3 Developers, 1 Tech Lead

Neuflize OBC, Full-stack Developer (**C#**) - SFEIR Paris — Paris, FR
Private bank providing wealth management and investment services to high-net-worth individuals and families — June 2018 – Aug 2018
4 months

- Built a web platform for life insurance management compliant with the EU DDA directive.
- Developed the front end in **Angular** / RxJS and the API in ASP.NET Core **Web API** with EF Core.
- Synchronized data between the new platform and the legacy system using SSIS (ETL) packages on SQL Server.

Methodology & tools: Visual Studio, TFS
Environment: C#, ASP.NET Core **Web API**, **Angular**, RxJS, SQL Server, EF Core, SSIS (ETL)
Team size: 2 Developers, 1 Product Owner

Betclic Everest Group, Backend Developer (C#) - SFEIR Paris — Paris, FR
Online gaming company specializing in sports betting, poker, and casino games — May 2017 – May 2018
1 year 2 months

- Integrated Betradar and Betgenius providers in C# / .NET Framework to expand supported sports coverage.
- Refactored the existing C# system for Betradar integration.
- Added new sports (handball, rugby union, rugby league) to Betradar and Betgenius integrations across the Broker and Worker services communicating via RabbitMQ.
- Introduced new scoreboards in AngularJS to the Betclic Sport front end for live betting.
- Wrote unit tests with NUnit and Moq.

Methodology & tools: Visual Studio, **Git**, JIRA, TeamCity, Octopus Deploy
Environment: C#, .NET Framework, RabbitMQ (Message Broker), NUnit, Moq, AngularJs, Dapper, StructureMap (IoC), AutoMapper, SQL Server
Team size: 3 Developers, 1 QA, 1 Tech Lead

JC Decaux, Backend Developer (**C#**) - SFEIR Paris — Paris, FR
Global leader in outdoor advertising and street furniture, providing innovative solutions for urban spaces — July 2016 – June 2017
1 year 1 month

- Redesigned the mapping system for JCDecaux's Urban Furniture Sales Product service in C# / WinForms (MVVM).
- Contributed to establishing the new application foundation in .NET Framework.
- Implemented new features in C# on a PostgreSQL database.
- Developed REST web services using **Web API** 2.
- Wrote tests with xUnit.net, FluentAssertions, and NSubstitute, and API tests with Postman.

Methodology & tools: Visual Studio, **Git**, JIRA (Scrumban), TeamCity, Postman
Environment: C#, .NET Framework, **Web API** 2, PostgreSQL, xUnit.net, FluentAssertions, NSubstitute, WinForms (MVVM), DockPanel Suite (Docking Library), GeoAPI
Team size: 2 Developers, 1 Tech Lead

OPCO 2I (ex OPCA Defi), Backend Developer (**C#**) - SFEIR Paris — Paris, FR
Organization managing training entitlements for individual training leave, serving companies in various sectors — Oct 2012 – June 2016 — 3 years 10 months

- Built a web application in ASP.NET MVC and Entity Framework 6 to collect company contributions.
- Developed training entitlement management for individual training leave in C# on SQL Server.
- Introduced Scrum and code-quality practices with StyleCop.
- Applied **DDD** with **BDD** tests in SpecFlow (**Given-When-Then** scenarios).
- Prepared releases with Wix and mentored new developers.

Methodology & tools: Visual Studio, TFS, StyleCop, Wix, Trello (Kanban), Scrum, **DDD**, **BDD**
Environment: C#, .NET Framework, ASP.NET MVC, **Web API** 2, SOAP, Entity Framework 6, WinForms (DevExpress), SQL Server, NUnit, Moq, SpecFlow
Team size: 7 Developers, 1 QA, 1 Scrum Master, 1 Product Owner

Sanofi Pasteur, Backend Developer (**C#**, VB.NET) - SFEIR Paris — Paris, FR
Global biopharmaceutical company specializing in vaccines and immunization solutions — Sept 2012 – Oct 2012 — 2 months

- Redesigned a SharePoint / WF workflow system.
- Migrated VB.NET code to C# to improve maintainability.
- Set up and configured the **K2** workflow engine.

Methodology & tools: Visual Studio, TFS, Agile
Environment: C#, VB.NET, .NET Framework, SharePoint, WF, **K2** Workflow Engine, SQL
Team size: 2 Developers, 1 Tech Lead

Aeroport de Paris, Backend Developer (**C#**) - Sopra Steria — Paris, FR
Sitdp/ParkPro/StatTD - Third-party application maintenance for parking management systems at Paris airports (Orly and Roissy) — Sept 2011 – July 2012 — 1 year

- Drafted and updated technical documentation.
- Fixed bugs and developed application enhancements in C#, C++, and Pro*C, tracked in Mantis.
- Maintained C# and WinDev applications on an Oracle database.
- Created and updated Crystal Reports VB.NET reports.
- Prepared software releases with TFS and SVN.
- Trained users.

Methodology & tools: Visual Studio, TFS, Bug Tracker Mantis, SVN
Environment: C#, VB.NET, C++, Pro*C, WinDev, Oracle, Crystal Reports, Silverlight, Linux Server
Team size: 1 Developer, 1 Tech Lead

Education

Master 2 — **Grenoble Alpes University**, Computer Science — Grenoble, FR — Sept 2009 – June 2010

Certifications

CCDV-F — Claude Certified Developer – Foundations — Sept 2026 – Sept 2027

Skills

Languages: Java, **C#**, VB.NET, Python, C++, JavaScript, JSON, YAML

Frameworks: .NET Core, .NET Framework, WinForms, Spring, **Angular**

Testing: NUnit, JUnit, Moq, xUnit.net, FluentAssertions, Test-Driven Development (**TDD**), SpecFlow, Behavior-Driven Development (**BDD**)

Architectures: CQRS, event-driven, Saga Pattern, Domain-Driven Design (**DDD**)

Databases: SQL Server, PostgreSQL, Sybase SQL, Oracle

Cloud: Azure (Functions, Container Apps, Service Bus, Key Vault, Cosmos DB)

Infrastructure: Docker, Kubernetes

DevOps: Git, GitLab, **CI/CD**, **SonarQube**, **Azure** DevOps
